Datasheet

DOOR AUTOMATION/ DWCP - DIGIWAY Control Panel

Product description

The DWCP is an external control panel that can be connected to the CDVI door operators (DIGIWAY Plus and DIGIWAY SR). It replaces the external side switch of the unit that controls the operating mode of the door, allowing operation away from the door in a convenient area.

The panel allows to set the operating mode to: 'Automatic', 'Door free' and 'Door open'. It can also set 'Day/Night' mode, disabling the external door sensors at night.

Thanks to its IP55 enclosure, the DWCP can be installed outside.

DWCP-B

DWCP-W

Key features

- DIGIWAY external control panel *(hard-wired directly to the unit)*
- Convenient setting of door operating modes (Open/Auto/Free)
- 'No touch' button activation
- Available in black or white
- Visual feedback with LEDs

Certification

DEEE

RoHS *Certification*

IP55

Product Information

Activation: 'No-touch' button
Output: Open collector
Colours: Black, white

Electrical specifications

Power supply: 12Vdc
Current consumption: 1.5 mA
